Experience

Microsoft | 2019–Present

Senior Product Designer

LEVEL 64 | 2024–Present
LEVEL 63 | 2023- 2024

Perception / Risk: Built AI experiences that help security teams prioritize risks, investigate why they matter, and act. Established a unified risk model across information architecture, workflows, interaction patterns, and reusable primitives.

Security Store: Led design through GA in September 2025, spanning commerce, solution and agent deployment/management, embedded experiences, and cross-portal coherence.

Security Copilot: Took an incubation AI security product from early concept to GA, designing the core product experience and the agent framework end to end, including how agents are procured, deployed, managed, and monitored, and the playbook builder that lets customers put them to work. Owned setup and usage monitoring, giving customers visibility into how agents and AI features were used and what they cost.

Product Designer II

LEVEL 62 | 2022–2023
LEVEL 61 | 2021-2022

Microsoft Defender: Designed cohesive consumer security experiences across five platforms (Windows, Web, MacOs, iOS, Android) aligning platform capabilities and design languages into one unified product. Led design of identity monitoring and homepage redesign. Owned our product design library

Product Designer

LEVEL 60 | 2020-2021
LEVEL 59 | 2019-2020

Contributed to early Microsoft Security & Compliance, focused on eDiscovery, Communication Compliance, and Insider Risk Management solutions.

Tools & methods

GitHub Copilot · Claude · Figma · Design intent documentation · Co-creation · Research synthesis · Cross-discipline design workshops

Education

Emily Carr University | Bachelor of Design, Interaction design, Valedictorian
McGill University | Bachelor of Science, Ecology
